¹ For KCK-6

---> Features: 90-Series AUX A, B, & C Inputs, 3 AUX 1 Amp Relay Outputs, D-Sub 25 90-Series Accessory Connector Parallel Feed Through

---> Supplied Items: Instruction Sheet (1pc.), KCK-6 (1pc.), Insulated Spade Lugs [0.250 female fully insulated, 16-14 wire range] (8pcs.)

***Hardware that may be required but NOT supplied - two 3/16" mounting screws, male-to-female DB-25 straight through serial cable, & wire peripheral.**

CAUTION: KCK-6 Relays are rated at 1A maximum. Do Not Exceed. The KCK-6 is not intended to directly drive siren and light packages. The siren/light package manufacturers recommended high amperage relay units and directions should be followed.

² For new radio tune orders only. Installs only the included KCH-10/11 key inserts. Must specify keys and placement (see Service Manuals for placement diagram, pg. 14). Also, see Service Manuals for technical details (pg. 14). Other Key Inserts are available from Parts Dept. See the "Service Related Accessories" section of the 90-series mobiles pricepages for more information.

³ Please specify exact length at 1ft. increments when ordering.

⁴ Extended control head cables exhibit a loss in speaker audio power to the control heads. For either type control head (KCH-10/11), it is recommended that the 13W audio output modification be implemented to drive extended cable runs and a KES-5 external speaker be used. Refer to the service manual pg. 15-17 for 13W modifications. Installing new radio firmware (hex files) via the KPG-44D software nor checking the firmware "checksum" is not possible through an extended control head cable. A standard KCT-22 cable of 25 ft. or less should be used when this has to be done. Normal KPG-44D radio parameter programming is possible at extended lengths.

⁵ This cable substitutes for the ff: DC Cables:

---> KCT-23M2 75/110W Dash Mount DC Cable: 4 Conductor: 2x10 ft. positive, 2x10 ft. negative

---> KCT-23M4 75/110W Remote Mount DC Cable: 4 Conductor: 2x23 ft. positive, 2x23 ft. negative

⁶ The firmware 094F gives the 90-series mobile the ability to generate a DTMF tone from the * and # keys without pushing the PTT button.

IMPORTANT TK-890 INFORMATION

TK-890 Receiver Channel Spread (20MHz)

The lowest receive channel spread range is the factory default tuning if not otherwise specified. Refer to the table below; order L-850 (no charge) and specify receive spread at the time of ordering. Out of range orders cannot be accepted.

TK-890HBK Rated Transmit Power (100W / 75W)

The transmit power output is rated at 100 W from 450-470 MHz and 75W from 470-480 MHz. Radio power level automatically adjusts within these band ranges.

Model	RF Deck Freq. Range	RX Ch. Spread	TX Ch. Spread	Remarks
TK-890BK/K	450-490	20 MHz	40 MHz	
Factory default		450-470	450-490	
Order L-850, specify:		460-480	450-490	Red Dot Indicator *
Order L-850, specify:		470-490	450-490	Yellow Dot Indicator *

Order L-850, specify:		492-512	480-512	Red Dot Indicator *
TK-890BK3	403-430	20 MHz	40 MHz	
Factory default		410-430	403-430	
Order L-850, specify:		403-423	403-430	Green Dot Indicator *
TK-890HBK	450-480	20 MHz	30 MHz	100 W: 450-470
Factory default		450-470	450-480	75 W: 470-480
Order L-850, specify:		460-480	450-480	Red Dot Indicator *

***Note:** If Kenwood changes the factory default, a colored label as denoted on the "Remarks" column, will be placed on the outside carton and on the radio itself to denote the frequency range to which it was tuned.

FleetSync® General Information

The 40, 50 & 80-Series radio firmwares include both the full set of FleetSync® Basic and FleetSync® Enhanced feature sets. However, the TK-2140/3140 & the TK-480/481/980/981 radios require the "FleetSync® Enhanced" Option to be ordered to "enable" the enhanced feature set. As of 10/01/02, the TK-280/380/780/880/7150/8150 come with the FleetSync® enhanced option pre-enabled.

FleetSync® Basic - "Basic" features are available in each radio as shipped from Kenwood (no activation is required). The entire Basic feature set is designed to operate between FleetSync® base and fleet radios (within the limitations of the radio controls and LCD display capabilities). Some Basic feature sets require a vendor-supplied base dispatch hardware and/or software for practical dispatch operations.

~ **PTT ANI (fleet portables/mobiles)** - digital ANI sent on each PTT using the FleetSync® ID.

~ **Caller ID / Caller ID Stack** ¹ (portables/mobiles)- decodes an incoming PTT ID and displays the caller alphanumeric tag; Caller ID Stack stores the last 3 calls for review.

~ **Selective Call** (portables/mobiles) - allows base-to-fleet and fleet-to-fleet selective calling via a pre-stored 100 ID list². Each ID can have an 16 character alphanumeric tag for easy selection and Caller ID recognition.

~ **Status Messaging** (portables/mobiles)- provides up to 50 pre-stored sixteen-character alphanumeric messages³ permitting a base to send a larger variety of job-type messages and fleet radios to display and respond accordingly with complimentary acknowledgements (includes special reserved Emergency, Emergency Man-down*, Emergency Mode Off *, Horn Alert (mobiles)* and Radio Stun/Acknowledge/Resurrect statuses are available).

¹ 80-Series: starting with Ver. 2.0 radios;

² 80-Series: starting with Version 2.0 radios only; previous versions had a 32 ID capacity;

³ 80-Series: starting in Version 2.0 radios only; previous versions had a 32 Status Message capacity

FleetSync® Enhanced Option- The FleetSync® Enhanced Option, if not already pre-enabled, must be "enabled" in the radio by ordering the appropriate labor codes for a Kenwood install or ordering the appropriate quantities of FS Enhanced options loaded in hardware key(s) and a KPG-65ED as a dealer field retrofit kit (see model price lists). This enables the following Enhanced features in addition to the Basic feature set:

~ **PC Serial Control** (mobiles only)- PC Serial Interface enables serial line communications between an 80-Series mobile radio and a FleetSync® compatible computer software application or peripheral device (enables the serial COM port I/O's of an 80-Series mobile) such as CAD/messaging, AVL/messaging software and devices such as status messaging units, desktop ANI encoder/decoder units and mobile data terminals (check with vendor).

~ **Short Text Messaging** (portables/mobiles)- decodes, stores and displays in the radio up to four 48-character Short Text messages

~ **Long Text Messaging** (mobiles only)- decodes and stores one 1024-character message for output to an external KDS-100 or decode-display device. A Long Text message is NOT stored in mobile memory or displayed in the mobiles LCD.

~ **FleetSync® GPS Data** (mobiles only; requires special modifications)- FleetSync® Enhanced option enables a FleetSync mobile to use the NMEA-0183 GPS serial data output (in RS-232C format) from a GPS receiver and send this data in the FleetSync® air protocol data format (the type GPS data sent is programmable in the mobile). This requires the FleetSync® Enhanced option in both fleet and base mobiles; an aftermarket GPS receiver (internal or external); special hardware modifications to connect the GPS receiver. Call Kenwood technical support for GPS receiver application notes and see Manning Rastrac information in the AVL price pages for software.

KPG-49D	P.C. Programming Software for TK-280/380/780/880/980/981 & TK-480/480	65.00
<u>Kenwood-installed FleetSync® Enhanced Option</u>		
L-875	FleetSync® Enhanced Option- enable in 80-Series (mobile/portable)	50.00
<u>Dealer-installed FleetSync® Enhanced Options</u>		
Note: Instead of L-875, options L-905/906/907; SRB08698 Hardware Key and KPG-65ED can be purchased for dealer field installation of the FleetSync® Enhanced option		
L-905	FleetSync® Enhanced Option (field retrofit) for 80-series; Price each for qty. 1-24	50.00
Note: Must order SRB08698 Hardware Key also: requires KPG-65ED		
L-906	FleetSync® Enhanced Option (field retrofit) for 80-series; Price each for qty. 25-99	50.00
Note: Must order SRB08698 Hardware Key also: requires KPG-65ED		
L-907	FleetSync® Enhanced Option (field retrofit) for 80-series; Price each for qty. 100+	50.00
Note: Must order SRB08698 Hardware Key which holds 100 ESN's maximum; multiple keys must be orders over 100. Also requires KPG-65ED.		
SRB08698 ²	Hardware Key (Sentinel Super Pro)	83.33
Note: SRB08698 hardware key holds 100 ESN's maximum; multiple keys must be purchased for orders over 100.		
KPG-65ED ³	FleetSync® Enhanced Option Installation Software	10.00
Note: Required for L-905/906/907 & SRB08698 use. This software is re-usable on future orders of L-905/906/907		
<u>Cable/options to connect an 80-Series base/control mobile to a PC</u>		
KCT-31	PC Serial Interface cable (80-Series mobile-to-PC connection for FleetSync®) Order L-918 for Kenwood installation	70.00
L-918	Install KCT-31 in 80-Series mobile (order KCT-31 separately)	21.00

Option Notes:

1. KPG-49D: As of June 2001, 80-Series "Version 2.0" radio productions were released (see LMR Sales Bulletin I-01-26LM for details).
~ KPG-49D V3.XX programming software is required for Version 2.0 radios. KPG-49D V3.XX programming software will program all early (pre-VER 2.0) radios except the early TK-480/481 production (the KPG-35D must be used). On all other models, the 2-tone data defaults to factory settings and will require re-entry.
~ KPG-49D V2.XX or earlier will not program any new Version 2.0 radios. V2.XX programs pre-Version 2.0 radios that were the first version to include FleetSync (TK-280/380/780/880/980/981-production starting 7/99 and TK-980/981 production starting 3/99).
~ KPG-49D V1.XX should be retained to program older TK-280/380/780/880 radios that do not have FleetSync® capability; the KPG-35D V1.XX should be used to program earlier TK-480/481 radios that do not have FleetSync.
2. The SRB08698 hardware key requires L-905, 906 or 907 options to be loaded into it. The hardware key requires the KPG-65ED to activate FleetSync® Enhanced Options in an 80-Series radio. The SRB08698 hardware key can be returned when empty for 50% credit. Call the LMR order desk for an RMA#. Credit will NOT be issued for the L-905/906/907 options.
3. The KPG-65ED is a one-time order and may be re-used on future orders of L-905/906/907. The SRB08698 hardware key must be installed on the PC parallel port for the KPG-65ED to operate.

PassPort® Options (Kenwood-installed)

2 KWD-DE10 (DES-OFB) or KWD-AE10 (AES) High Level Encryption Options and radios containing encryption are export controlled by the U.S. Department of Commerce Bureau of Industry & Security EAR regulations and may either require an Export License, are eligible for a License Exception (ENC) or are exportable with No License Required (NLR) depending on the country, the consignee and the intended use. High level encryption is a special commodity that may likely require an export license to most countries. See www.bis.gov for more information regarding export regulations. DO NOT SHIP encryption items outside the U.S. without proper DOC/BIS Export License and/or compliances. Kenwood may request the following information to be submitted at time of order (this information must meet Kenwood internal approvals prior to shipment even if being returned to Kenwood later):

a. Initial Destination: Initial delivery point if different from Ultimate Destination (customer distribution center, headquarters, dealership, manufacturer's representative)

* Business/Agency Name:

* Address

* Contact Person Name

* Contact Phone:

b. Ultimate Destination: Final delivery point(s); deployment/distribution

* Business/Agency Name

* Address:

* Contact Person Name:

* Contact Phone:

c. Intended Use of Radios: Law enforcement, security, operations, etc.

2. Key Inserts: For new radio tune orders only. Installs only the included KCH-14/15 key inserts. Must specify keys and placement (see Service Manuals for placement diagram, pg. 14). Also, see Service Manuals for technical details. Key Inserts are available from Kenwood Parts Dept.

3. Please specify exact length at 1ft. increments when ordering.

4. Extended control head cables: Using extended control head cables instead of the standard cables will result in a loss of speaker audio power to the control heads. For either type control head (KCH-14/15) it is recommended that the 13W audio outputs be used to drive extended cable runs and a KES-5 external speaker. Refer to the radio service manual for 13W modifications for the KCH-14 (the KCH-15 does not require any modification). Note: Installing new radio firmware (hex files) via the KPG-95D software nor checking the firmware "checksum" may not be possible through an extended control head cable. A standard KCT-22 cable of 25 ft. or less should be used when this has to be done. Normal KPG-95D radio parameter programming is possible at extended lengths.

5. This modifies the following four conductor DC Cables to two conductor:

KCT-23M2 75/110W Dash Mount DC Cable (4 Conductor: 2x10 ft. positive, 2x10 ft. negative)

KCT-23M4 75/110W Remote Mount DC Cable (4 Conductor: 2x23 ft. positive, 2x23 ft. negative)

 TK-6110K2 (35.0 - 50.0 MHz model): 42.00 MHz

**IMPORTANT NOTICE [Power/Bandwidth vs. VSWR]**

The TK-6110 mobiles output power will be significantly reduced with VSWR = 1.5 or greater.

TK-6110 Output Power Performance (nominal; transmission line losses not included)

VSWR	Output Power
1.2 or less	70W or more
1.3-1.5	60W or more
More than 1.5	60W or less

The following table shows the bandwidth performance of a typical low band antenna maintaining a VSWR= 1.5 or less with the TK-6110 models.

TK-6110K		TK-6110K2	
Frequency	Bandwidth	Frequency	Bandwidth
29.7MHz	0.4MHz (+/-0.20MHz)	35.0MHz	1.0MHz (+/-0.5MHz)
33.0MHz	0.4MHz (+/-0.20MHz)	40.0MHz	1.8MHz (+/-0.9MHz)
37.0MHz	1.0MHz (+/-0.50MHz)	50.0MHz	1.8MHz (+/-0.9MHz)

IMPORTANT NOTICE:

The TK-6110 design eliminates the need for the following accessories typical of Kenwood compact mobiles:

1. KCT-19: 15-pin accessory connector is built in.
2. KAP-1: the Horn Alert output is provided on the 15-pin connector (see service manual for maximum current rating).

Audio Power: 3W internal speaker / 10W external speaker (KES-5).

FleetSync® is not available for the TK-6110.

KES-3 is not compatible, use KES-5.

The following frequencies are not allowed in the TK-190 and TK-6110 models: 33.6 MHz and 42.0 MHz.

KGP-2A / 2B GPS Automatic Vehicle Location Units

Important! Please read prior to selling a KGP-2A/2B AVL system and ordering product:

1. **KGP-2A/2B Compatible AVL Mapping Software is Required** - A KGP-2A/2B AVL system requires a AVL mapping software specifically engineered for KGP-2B serial protocol compatibility. This software is available from Manning NavComp (see Manning RasTrac information).
2. **Read the ordering instructions** in the following base station and fleet mobiles sections for possible additional options and hardware requirements.
3. **Check the "ACCESSORY COMPATIBILITY" chart** that follows for accessory limitations when using KGP-2A/2B units.

KGP-2A/2B FEATURES:

KGP-2A/2B FEATURES

- Compatible Radios: 60G/62/63G/80/150/180/160-Series mobiles
- KGP-2A/2B air protocol is backward compatible with KGP-1A/1B
- Programmable Auto-reporting or polled updates
- 256 Mobile IDs x 256 Groups
- Mil-Spec 810C, D & E Dust, Vibration and Shock
- Over-the-air programming- Data Rate 1200 or 2400 baud (except initial programming; see KPG-73D)
- Windows® 95, 98 & Me Programming Software (KPG-73D)
- Sixteen Multi-purpose Programmable I/O's [External Connectors; [DB-9 (ACC2); DB-15(ACC-3)]

Chart Key

X = compatible

X () = compatible, but additional options/modification may be required; some modifications are "Dealer-installed only; refer to Kenwood application notes" (no Kenwood install labor code available).

Blank = Not compatible

Gray = Non-applicable

Remarks

(a) The KAP-1 PA/HA relay board requires a KCT-19 to route the PA & HA outputs external of the mobile.

(b) Installing the option in the left-hand column will require the KCT-18 to be routed under the DC cable grommet, stripped /tinned and soldered directly to the ignition sense input inside the mobile Dealer-installed only; refer to Kenwood application notes.

(c) [80-Series mobile only] This install must share the SB+ and GND connections. The KCT-31 connects to the 80-Series COM1 port only. Dealer-installed only; refer to Kenwood application notes.

(d) [80-Series mobile only] This install must share the SB+ and GND connections. Dealer-installed only; refer to Kenwood application notes. The KAP-1 requires a KCT-19.

FOR 80-SERIES MOBILES

Model	Description	List
-------	-------------	------

FOR EACH BASE STATION ORDER:

1. KGP-2B Modem Unit - one KGP-Protocol base/control station modem unit required per AVL system
2. KCT-34 interface cable & L-929 install code - connects the KGP-2B to the base/control station mobile
3. Computer Serial Cable Required (not supplied)- The KGP-2B-to-PC COM port connection for AVL data is made via a dealer-supplied computer serial communication port cable. The serial cable should be a D-Sub 9-Pin Female (KGP-2B; ACC1 end) and the appropriate D-Sub 9-Pin or 25-Pin on the PC serial COM port end. Serial cables are wired "Null Modem" with pins 2-to-3 and 3-to-2 configured end connectors.

FOR EACH FLEET MOBILE ORDER:

1. KGP-2A GPS Receiver-Modem Unit - the KGP-Protocol fleet mobile unit
2. KCT-34 interface cable & L-929 - connects the KGP-2A to the fleet 80-Series mobile
3. Note: KCT-19 & KCT-34 cables cannot be installed simultaneously- Therefore using a KCT-34 excludes plug-in of a KCT-19 for KES-5 external speaker (use KES-3), Horn Alert output, Data modem I/O's, footswitch input and headsets.

KGP-2B	Base Modem Unit	\$225.00
	1. One KCT-34 is required for each fleet and base mobile radio 2. L-929 - Install KCT-34 to 80-Series Mobile for KGP-2A/2B interface 3. The KCT-34 is 12 inches in length; use a KCT-36 (9.8 ft) extension if required	
KGP-2A	GPS Receiver / Modem Unit (includes one dash-mount GPS antenna)	\$525.00
	1. One KCT-34 is required for each fleet and base mobile radio 2. L-929 - Install KCT-34 to 80-Series Mobile for KGP-2A/2B interface 3. The KCT-34 is 12 inches in length; use a KCT-36 (9.8 ft.) extension if required

Important! Please read prior to selling a KDS-100 system and ordering product:

1. **KDS-100 Compatible Dispatch Software May Be Required-** The KDS-100 used a fleet unit will decode Status Messages and Selective Calls sent other FleetSync®-capable portables or mobiles, from a KDS-100 with a FleetSync® capable mobile (PC mode) or a KDS-100 with a non-FleetSync® capable mobile (air mode). However, Short and Long T Messaging requires a base station FleetSync® capable mobile PC Serial Interfaced with computer running a FleetSync® compatible dispatch software capable of creating and sending Short/Long Text Messages. This software is available from vendors such as:

IDA Corporation, Fargo ND: KenCall Dispatch software
Kenwood Communications Corporation: Fleet Dispatch Pro software

2. Check the "ACCESSORY COMPATIBILITY" chart that follows for accessory limitations when using KDS-100 units.
The KDS-100 cannot be used simultaneously with a Kenwood KGP-2A/2B AVL unit.
